

Elevate Your Training Programs with Aitom AI Trainer

Driving a More Personalized and Efficient L&D Strategy with AI

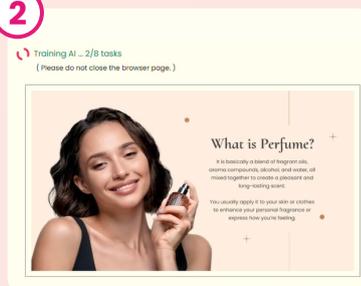

1. Create AI Trainer from Lesson Slides Easily

1

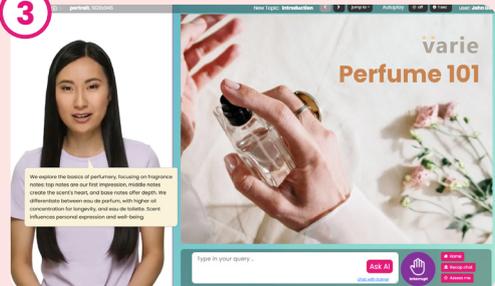

Import lesson slides.

2

Let Aitom auto-train an AI Trainer with lesson content.

3

Voila! Your AI trainer is ready to deliver your lesson with voice.

Benefit: Save resources and time by creating AI trainers to deliver engaging lessons to new employees and partners, instead of burdening staff with extra training duties.

2. Deliver Lessons Anytime, Anywhere

Benefit: Trainees can attend lessons by AI trainers at their own pace any time and as often as needed, alleviating the scheduling challenges for your HR and L&D teams.

3. 1-on-1 Interactive Learning – Like Having a Real Private Trainer

Middle

Base

Base Note

- Emerges after top and middle notes fade
- Provides depth and longevity
- Typically rich and earthy
- Includes scents like vanilla, musk or wood

Assess me

What is the primary difference between eau de parfum and eau de toilette in terms of fragrance concentration?

Benefit: Trainees can pause the lesson anytime and ask the AI trainer questions to clarify doubts instantly. They can also request the AI trainer to test their knowledge and receive helpful feedback. An interactive one-on-one learning experience!

4. Quick Recap and Review

14 February 2025

What is fragrance oil?

Fragrance oil is a concentrated blend of aromatic compounds and essential oils that imparts specific scents to products like perfumes, candles, and cosmetics. These oils can be derived from natural sources or created synthetically, providing a diverse range of aromas that enhance personal experiences and create inviting atmospheres.
